# the Harrington Group's Web-Based Corrective Action System

This zero client software allows your users to access your system through their browser, from their desk...or anywhere in the world making caWeb the most effective way to deploy a Corrective/Preventive Action system throughout your department or distributed organization.

- Employs Advanced Web Technologies
- Intuitive, User Friendly Interface
- Platform Independent, Access from any Browser
- Exceeds ISO-9000:2000 Requirements
- Flexible Design, Customizable to meet Cross Industry needs
- Secure Data Management
- Online Administration and Configuration Control
- Excellent Functionality for:
  - Corrective Action Programs
  - Project Management
  - Customer Complaint
  - Supplier Corrective Actions

The screenshots show the following pages:

- Login Page:** A form with fields for Login ID (john doe) and Password, and a 'go' button. It includes a dropdown for 'Records' set to 'Demo Database'.
- Home Page:** Displays 'Welcome to caWeb' and 'You are logged in as: John Doe'. It features an 'Alerts' section with 4 actions requiring review and an 'Options' menu with links like 'Initiate Issue', 'Assign Action', and 'Set Personal Preferences'.
- Problem Pareto Report:** A bar chart titled 'Problem Pareto Report' showing 'Overdue Records' for various categories like 88-900, C101, etc.
- Action List Page:** A table listing actions with columns for Action Number, Assignee, Subject, Date Opened, Status, and Coordinator. The table shows 11 actions, with the first one being 'Equipment Repair' by George May.

**Industry wide, caWeb leads the competition as the #1 web based Issue and Action Manager!**
